- Animated Text, Graphics and Logos using GIF, TGA, MPEG and more

- Multiple text and graphic zones may be independently sized and positioned

- Page scheduling, including looping durations or specific day,

Agenda Software Summary

Ideal for live events, such as public meetings, conferences, sporting events and more, Agenda is a software feature of ChyTV Tools that utilizes the Active Data Tab Controls on a ChyTV Page to facilitate the real time changing of the on-screen contents of that ChyTV page during live operation.

Agenda makes it easy to create lists of text, graphics, animations and videos that can be used to interactively update the ChyTV Page displaying on the output video with a single press of a keyboard key or a double click of the mouse.

Agenda Features and Operation

The Agenda functionality is best used when connected to a live ChyTV graphics product. An Agenda File is a Comma Separated Value file that will contain all the entries that will be used to update the ChyTV Page Active Data Tag Controls that are on the displaying Page in the ChyTV.

For example a ChyTV Page can be created using our WYSIWG layout tool, ChyTV Author, as a traditional lower third type display where a Head Shot Image is to the left followed by the Person's Name to the Right and the Person's Title right below the name.

With the page displaying on the ChyTV and Tools being connected to the ChyTV with the matching project running on the ChyTV the output of the ChyTV will display the items just sent in the locations on the screen, with the fonts and colors set up in Author.

Selecting another row on the Grid with different information will change the displaying contents with the new entries on the new row selected.

Agenda Driven Lower Third Examples

Company Summary

We manufacture and distribute several different models of video graphic systems that we brand as ChyTV. These ChyTV systems are very high-end graphic systems designed specifically for Broadcasting at TV stations, PEG channels, government, municipalities, military facilities and local cable dedicated community channels. Our entire staff have been working in the television graphics industry for over 30+ years. Our products have the same professional look as what you see today on broadcast television programming.

In addition, we design and provide high end quality text and graphic turn-key systems with dedicated solutions for Digital Signage applications that require on time messages to a single or infinite number of digital signage displays. So, whether you are looking for a Digital Signage solution as a way to inform and spread information or working inside a Broadcast environment, tasked with finding a high end text and graphic CG without the high end cost we have a ChyTV model that will meet your requirement.
